ABSTRACT

Mulya, Jauza Naja. 2025. The Effectiveness of Picture Word Inductive Model on Students' Writing Ability on Descriptive Text. Sarjana's Thesis. English Language Education Study Program, Faculty of Teacher Training and Education, Lambung Mangkurat University, Banjarmasin. Advisor: Dr. Moh. Yamin, M.Pd., Eka Puteri Elyani, M. Pd.

Keywords: descriptive writing, guided question strategy, pwim

Writing is inherently challenging due to its complex process, especially when done in a foreign language. However, its practical purpose makes it important to learn. Kurikulum Merdeka, Indonesia's latest curriculum, addresses this by including English writing in the 7th-grade curriculum, focusing on descriptive text. Previous studies show that the PWIM is more effective than lecture-based learning in enhancing descriptive writing ability. However, its effect compared to other strategies remains underexplored. This research aims to study whether or not there is a difference between the use of the PWIM and the Guided Question Strategy on 7th-grade students' descriptive writing ability. Using a quasi-experimental design, the sample were taken through purposive sampling from two intact class consisting of 66 students at SMPN 1 Banjarmasin. Data from pre-test and post-test analyzed using an independent samples t-test through SPSS 25. Results showed a significant difference ($\text{sig} = 0.02$), suggesting that there is a difference between the PWIM and the Guided Question Strategy on 7th-grade students' descriptive writing ability at SMPN 1 Banjarmasin. However, attention to grammar and mechanics is recommended to enhance its effectiveness further.
